YOUR WAKE *orthodontic* TEAM!

Mac
COLLIE
DDS, MS

“Orthodontics is a natural fit for my love of studying faces and serving my community. However, beyond art, orthodontics allows me to study the growth and development of faces throughout a patient’s lifetime in three dimensions. Whether developing the growth pattern of a late childhood patient or preparing a middle age adult for much needed tooth replacement, the result is always a rewarding improvement.”

-Dr. Collie

Erin
MCCUTCHEM
DDS

“As an orthodontist, I must first build the trust of the families and patients that come into our practice. It is not until I gain this trust that I then am given the opportunity to make a significant impact in their lives by giving them a smile they are proud of. This is an enormous challenge and responsibility, but one that I graciously accept and enjoy. It is an intense feeling to know that the work we do in orthodontics can change a person’s life. This feeling motivates me to go to work every day with a smile on my face.”

-Dr. McCutchen

Jordan
LAMB
DDS, MSD

“As an orthodontist, I have the unique opportunity to make a lasting, transformative difference in my patients’ lives. I believe there is nothing more rewarding than being able to use my training, expertise, and skills to provide people with the smile that they have always wanted. Witnessing firsthand the confidence my patients gain with their new, beautiful smiles is the gift that keeps on giving!”

-Dr. Lamb

Randy
MACON
DDS

“I come to work feeling incredibly blessed knowing that I have the opportunity to help change people’s lives for the better through practicing orthodontics. My patients are my passion, and I’ve always found such joy and reward in learning about them, gaining their trust, and helping them achieve the beautiful smiles they deserve and need. I am excited and thankful to build relationships with my patients that far outlast their time in braces, and this is what drives me to provide nothing but the best care for each person who comes to me for treatment.”

-Dr. Macon
