Stephen Pretzer, DDS

Watching kids grow and being a part of their lives is an invaluable and gratifying experience. I feel very fortunate to truly love what I do each and every day."

David Konnstein, DDS

Pediatric dentistry gives me the unique opportunity to help children foster great self-esteem as they learn to navigate a potentially stressful situation with playfulness, creativity and imagination.

Robert Moran Jr., DDS, MS

Helping children enjoy their early dental experiences is one of my main goals as a pediatric dentist."

Travis Hicks, DDS, MS

As a pediatric dentist, I have the opportunity to make an early impact on a child's perception of the dentist and oral health. I am passionate about giving children a dental home, a place where they and their parents can trust in the quality of care they receive."

Kathryn Dundervill, DMD, MSD

It is so rewarding to have the opportunity to ease children's fears making their dental appointment a fun one. My goal is to improve a child's attitude of going to the dentist and hopefully make a positive impact on their perception of their overall health."
